

# Apply filters to SQL queries

## Project description

In SQL, the AND, OR, and NOT operators can be used to further filter SQL queries and retrieve specific information from databases.

## Retrieve after hours failed login attempts

```
MariaDB [organization]> SELECT *
-> FROM log_in_attempts
-> WHERE login_time > '18:00' AND success = 0;
```

event_id	username	login_date	login_time	country	ip_address	success

## Summary

This practice gave me experience in using SQL to run SQL queries to retrieve information from a database and apply AND, OR, and NOT operators to filter SQL queries.
